At a Glance

“Flying Books” is an innovative series launched under **STUDENTS Success BOOKS**. It encompasses highest level of teaching methodology, where the textbooks are well-researched and educative and are prepared by experienced authors. We have expanded our series from Primary level upto a higher level which now consists of books on all subjects for all classes. Each book of the series is provided with digital content to make the learning more stimulating and interesting.

Each book in the series is based on the latest education pedagogies and the current education system material that is learner-centric and supports in making life-long learners. We also have digital content with our series which supports the books and aims at holistic development of students.

We aim to create good quality books for children at affordable rates. Education and values are the tools which can transform young minds into catalyst of economic progress and social change. This belief and our invariant love for children drive us to publish this series.

We hope that a glance at our books must generate conviction that while we are extremely simple in writing, we are equally robust in imparting quality through books that facilitate learning as a matter of joy and pleasure.
